

Dollar Community Development Trust: Tree Planting Statement

The Trust has developed a long-term tree planting strategy which we are starting to implement in March 2020.

The principles of the strategy are:

- Its sole purpose is to reduce our community carbon footprint;
- **All** local landowners are involved and have committed to providing suitable land for planting;
- All trees are planted for non-commercial purposes, they will not be harvested;
- The trees are generally acquired cost-free by the Trust from various sources. The funds raised will be used for further tree planting, replacing dead trees and to provide supports and guards for the trees. Any surpluses will further the charitable purposes of the Trust, investing in the local community;
- We are grateful to Harviestoun Estate, Arndean Estate and Clackmannanshire Council for their support in providing land for community tree planting.

If you have any queries regarding this statement, please contact the Trust:
